- Installation & Implementation
- Fixed Asset Data Conversions
- Custom Report Writing Services
- FAS Product Upgrades
- Fixed Asset Inventory Services

Inventory Services Tailored to Your Organization

A FAS consultant will develop a detailed plan of action and customize inventory procedures to match your unique environment. Then they will carry out the plan by performing actual inventory services. During this process, you'll also receive:

- Comprehensive project management
- Automated data collection methodologies
- Inventory work plan
- Overview of bar code inventory technology, including Windows® CE and Palm OS® devices
- Quality control and reconciliation procedures

Once initial inventory procedures are tested and successfully executed, all subsequent inventories will fall right into place. You'll have a systematic inventory process that's specifically designed to meet your exact data and reporting requirements.

Experience You Can Count On

FAS consultants bring depth of experience and great expertise to every project, ensuring a smoother, faster inventory. Your FAS consultant will oversee the entire development of your in-house inventory system, and manage all stages of the initial inventory—from bar coding assets to

(over, please...)

reconciling inventory data—eliminating the hassle of training internal staff to conduct an asset inventory.

Valuable Insights on Bar Code Technology

You'll be introduced to the latest bar code readers and scanners, as well as other accessories that work in conjunction with FAS Asset Inventory to electronically collect asset data. Your consultant will configure your bar code reader to channel inventory data directly into FAS Asset Inventory.

You'll also be advised on selecting the most appropriate bar code technology and labels for your specific inventory, and briefed on various data collection methodologies.

Quality Control Every Step of the Way

Quality control is key to a successful asset inventory. That's why FAS consultants carefully monitor the inventory with periodic checkpoints for data accuracy.

Hassle-Free, Economical Services

Need help doing the actual physical inventory? FAS has established relationships in place with third party business partners who will perform a physical inventory and deliver a customized database of assets ready to use with your FAS solution.
