- FAS Product Upgrades
- Fixed Asset Inventory Services

A member of FAS Suite®—an integrated asset management solution.

For maximum performance and scalability in fixed asset management, FAS Asset Inventory for SQL Server provides automated asset inventory tracking and reconciliation capabilities for SQL Server based computing environments. Using state-of-the-art bar code technology, including Windows® CE and Palm OS® devices, FAS Asset Inventory for SQL Server creates and tracks multiple physical inventories of assets quickly and efficiently—so you achieve tighter control of your fixed assets.

Gain greater speed and scalability for tracking assets.

- Seamless integration with FAS Asset Accounting™ for SQL Server
- Enhanced history tracking allows the capture of critical before and after asset events
- Faster processing times with the SQL Server infrastructure
- Scalability with client/server architecture and support for multiple databases
- Conduct multiple inventories concurrently at various sites and reconcile data at one central location
- Supports both types of inventories—*Baseline* to add new assets, and *Dynamic* to verify any data on existing assets

(over, please...)
