

## FAS Inventory Reader Hardware:

*Automated Tools for getting the most out of your Fixed Asset Inventory System*

The hardware below represents the leading technology in fixed asset inventory and tracking. Combined with FAS Asset Inventory, these products will provide you with the best solution for maintaining your fixed assets. FAS provides these and many more solutions for your unique needs. Learn about the products then call us to find out how we can develop a fixed asset solution for your business.

### All-in-One PDA's and Scanners

Include built-in scanner devices to provide easy, mobile scanning capabilities. Data is then integrated with your existing desktop or terminal systems

Model	Description	CPU	Operating System	Memory	Picture
Symbol® PPT 8800 Color	Designed for mobile workers and managers within the enterprise who require a rugged, high-performance, handheld computer far more durable and reliable than typical consumer devices, the PPT 8800 is powerful enough to execute mission-critical applications, yet small and light enough to be carried in a pocket or on the hip.	Intel Xscale 300Mhz	Microsoft® Windows® CE .NET 4.1	32MB	
PDT 8100 w/keyboard	The PDT 8100 Series from Symbol Technologies bridges the gap between pure pen-based and key-based mobile data collection solutions. Available with multiple keyboard options, the PDT 8100 is a versatile, large-screen hand-held that delivers the functionality of Pocket PC with the convenience of tactile, key-based data entry.	Intel StrongArm 1110 206MHz	Microsoft Pocket PC	32 MB RAM/32 MB ROM	
Symbol SPT 1800	The SPT 1800 Series of pen-notepad computers offers the most advanced Palm Powered™ solution for your work force. This family of rugged mobile computers combines integrated scanning, sophisticated wireless connectivity and powerful processing capability with the Palm OS® platform.	DragonBall VZ - 33MHz	Palm OS®	8 MB RAM/4 MB ROM	

### Pocket PCs and Add-on Scanners

Pocket PCs work with the scanners for easy data collection. Data is then integrated to your existing desktop via a communications port. Users must purchase one of the two available scanners with their choice of a Pocket PC.

#### Pocket PCs:

Model	Description	CPU	Memory	Picture
HP iPAQ 2210	Smaller is definitely better when it comes to the HP iPAQ series of Pocket PCs. HP iPAQ product line combines the features, performance, and expandability you need to meet all your handheld computing needs. The included card-based bar-code scanner is based on miniature Linear CMOS Imaging technology. The scanner reads all popular linear bar code symbologies and uses only 57mA of power during scanning to maximize battery life.	400 MHz Intel XScale	64MB
